## PRODUCT OFFERING

The kit contains all the cleaning items required to clean and maintain the entire Tyco Electronics thermal transfer printer range. It is recommended that all thermal transfer printers are cleaned at least once a week. Regular cleaning will extend the life and performance of the printer and protect key components including the print head and drive rollers from premature wear.

**NOTE : CUSTOMERS WHO PURCHASE THIS KIT CAN THEN ORDER INDIVIDUAL ITEMS FROM THE KIT WHEN REQUIRED.**

## PRODUCT OFFERING

Part Number	Description
CP5431-000	TT-Printer-Cleaning-Kit
CP5435-000	TT-Printer-Head-Cleaner
CP5437-000	TT-Platen-Roller-Cleaner
CP5441-000	TT-Anti-Static-Foam-Cleaner
CP5438-000	TT-Label-Remover
CP5439-000	TT-Cleaning-Wipes
CP5440-000	TT-Cleaner-Buds

## KIT COMPONENTS

Component	Recommended Use	How to Use	Reason for Using
<b>Thermal Printhead Cleaner</b>	Cleaning all Tyco Electronics Printer print heads. Leaves no residue	Spray liquid onto the print head, leave for a few seconds, then wipe in one direction using the cleaning cloths or cleaning buds supplied in the kit.	Dust and ink residue build up is the most common cause of premature print head wear. Regular cleaning reduces wear and produces sharper and more defined print characters.
<b>Platen Roller Cleaner</b>	Cleaning printer rollers. Used for cleaning and restoring the grip on the rollers	Spray liquid onto the roller, leave for a few seconds, then wipe in one direction using the cleaning cloths or cleaning buds supplied in the kit.	Dust and ink residue can build up on the rollers leading to a loss of grip, and risk of ink transfer onto the printed marker sleeves or labels. Regular cleaning removes this ink build up and improves roller grip and flexibility, reducing the risk of product jamming up in the printer.
<b>Anti-Static Foam Cleaner</b>	General cleaning of printers.	Spray liquid onto the surface then wipe in one direction using the cleaning clothes or cleaning buds supplied in the kit.	This is a highly efficient biodegradable cleaner specially developed for use on all the printers' plastic, metal and glass surfaces. Not only ideal for removing dirt and grease its unique anti-static properties remove static.
<b>Label Remover</b>	Removing selfadhesive labels.	Spray on the surface of the label until wet. Leave for 5 minutes then peel off the label and wipe dry.	A build up of labels around the feed path of the printer can lead to product jams.
