

# ANTENNA AND BOARD LEVEL SHIELDING SOLUTIONS

When designing for today's wireless applications and smart solutions, flexibility is key. TE's extensive antenna portfolio allows you the flexibility to create custom solutions, or leverage our standard antenna designs.

Antenna applications and board level shielding (BLS) solutions go hand-in-hand. We provide the holistic expertise for integrated and efficient solutions for your wireless connectivity and interdependent PCB signal designs. Engage with us to develop just the right balance in your wireless and shielding performance for clearly enlightened results. Click on the part number links below and **Order Your Sample, Today!**
