### DESCRIPTION

The RS1G08 single 2-input positive-AND gate is designed for 1.65V to 5.5V  $V_{cc}$  operation.

The RS1G08 device performs the Boolean function  $Y = A \cdot B$  or  $Y = \overline{\overline{A}} + \overline{\overline{B}}$  in positive logic. The device is fully specified for partial-power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

The RS1G08 is available in Green SOT23-5 and SC70-5 packages. It operates over an ambient temperature range of -40°C to +125°C.
