IT WORTH

» COMPANY INTRODUCTION

KINKONG is a manufacturing and trading combo dedicated in connectors, terminals, silicone rubber seals, wiring harness and related accessories. Our products are sold in various regions worldwide, such as the Americas, Europe, Australia, and Asia, with exports accounting for over 78% of the total sales.

R&D Team

» KINKONG TEAM

Since our establishment, we have upheld the attitude of "being humble in dealing with people and meticulous in handling affairs." We are now becoming an important partner for mainstream aftermarket, tuning market clients, OEM factories and OEM supporting factories.

Warehouse Management Team

» PRODUCTION WORKSHOP

By utilizing advanced management tools, such as ERP and CRM systems, and adhering to international quality standards like ISO9001 and IATF16949, we are forming a reliable, efficient, and professional scientific management system and standards.

» **AUTOMOTIVE CONNECTORS AND WIRING ACCESSORIES**

Based on many years of market experience and accumulation, we integrate the majority of the industry's value chain to continuously optimize product structure and quality. From injection-molded plastic parts to stamped terminals and silicone rubber seals, we strive for excellence, establish scientific inventory, and control every aspect to ensure product quality and timely delivery.

Kinkong connection, make it worth

We followed a steadily and progressive development philosophy, emphasizing internal cultivation and aims to create a platform-oriented sustainable development company, continuously improving employee satisfaction

Professional production process

Factory organization and management

Technical team and after-sales service

Introducing high-end production equipment

Effective solutions for improving production and efficiency

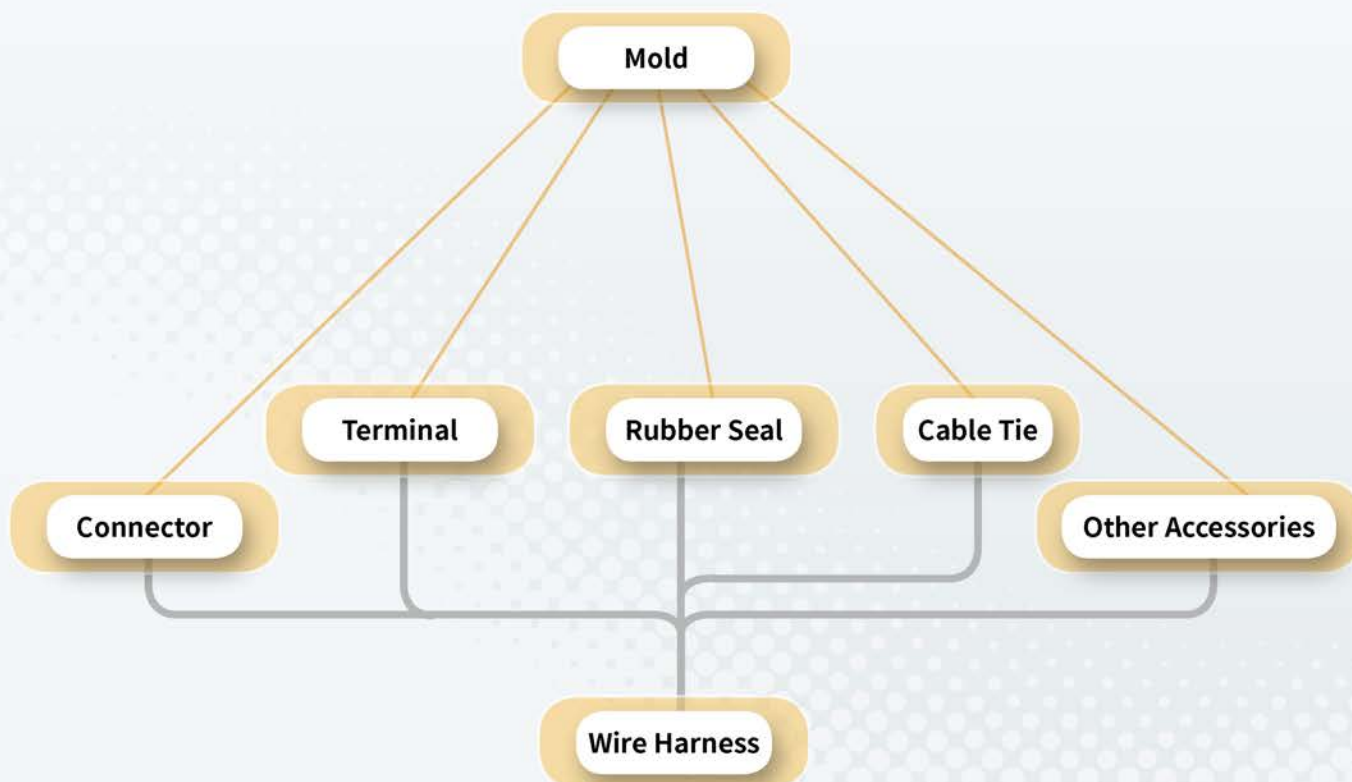

» CUSTOM WIRE HARNESS SERVICE

- ✓ Focus on the vehicle industry
- ✓ Sufficient accessories inventory
- ✓ Strong technical support
- ✓ Package & delivery solutions

Kinkong has the manufacturing capacity to cover the most industry value chain, ranging from wiring accessories to the wire harness manufacturing process. We possess our own mold, stamping, injection molding, rubber seals, and other manufacturing workshops, allowing us to provide one-stop support solutions for wire harness assembly. This enables us to achieve cost optimization, ensure controllable delivery, and maintain stable quality.

DT Series

Overview

DEUTSCH DT environmentally sealed connectors are used in harsh environment applications where even a small degradation in connection may be critical. They are used for trucks, buses, construction, agricultural vehicles, etc.

DTM Series

Overview

DTM connectors are environmentally friendly and sealed, capable of withstanding harsh environments and meeting the requirements for low current, multi-pin connectors. Widely used in trucks, buses, off-highway, agriculture, mining, emergency vehicles, marine, etc.

HDSCS Series

Overview

HDSCS series connectors stand out for their exceptional performance and robustness also providing excellent resistance to corrosion and ensuring long-lasting performance even in challenging conditions.

Kompakt Series

Overview

The Kompakt connectors are versatile electrical connectors widely used in automotive industries for their reliable connections. It provides a secure and efficient means of transmitting electrical signals, making it ideal for applications where limited space is a concern without compromising performance.

Accelerator Pedal Connector

Overview

The accelerate pedal connector is a crucial component in a vehicle's electronic control system, serving as an interface between the accelerator pedal and the engine's electronic throttle. It enables the smooth and precise transfer of input from the driver's foot to the engine, regulating the vehicle's speed and acceleration accordingly.

EFI ECU PCB Connector

Overview

Ensures the seamless transmission of electronic signals, allowing for precise fuel delivery and engine performance control, contributing to improved efficiency and reduced emissions, widely used in motorcycles.

Overview

Connector terminals are designed to provide robust and efficient cable connections. These are engineered for high resistance to vibrations and thermal influences.

Seal

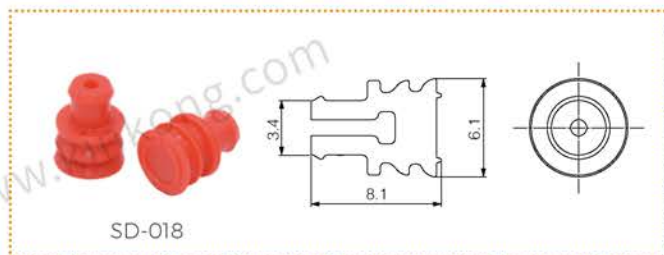

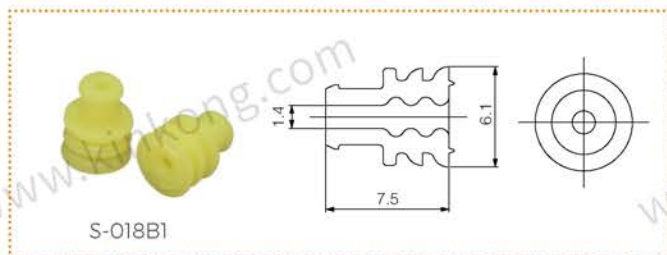

Overview

Seals are essential components designed to provide a watertight and dustproof barrier of electrical connectors in vehicles, ensuring reliable and consistent electrical connections in automotive systems and contributing to the overall performance and longevity of the vehicle's electrical components.
